Office 423-778-6941 • Fax 423-778-6936

PENILE CURVATURE REPAIR FOR PEYRONIE'S DISEASE (TAP) POST-OP INSTRUCTIONS

ACTIVITY:

- **No sexual activity for 6 weeks. Early sexual activity may lead to recurrence of curvature.**
- Avoid all strenuous activity (such as cutting grass, chopping wood, etc.) or lifting, pushing, or pulling more than 15 pounds for 2 weeks. You may climb stairs.
- May shower the next day after your surgery, but no soaking in a bathtub, hot tub or swimming pool, etc. for 2 weeks. Do not scrub incisions.

WHAT TO EXPECT:

- Swelling of the incision and scrotum is normal. Expect bruising 3-14 days post operatively and longer for the swelling to subside.
- You should apply ice packs to the incisions for 24-48 hours after the procedure.
- Erections can be painful in the initial post operative period and may wake you while sleeping. Erections are encouraged and will not compromise the repair.
- A small amount of bloody drainage from the incision is normal.
- You may apply Neosporin or bacitracin to the incision to decrease irritation of the wound from friction.
- Watch for constipation. Please take some Milk of Magnesia or Miralax if you are not having a bowel movement daily.

PAIN RELIEF:

- Take pain medication as directed by your surgeon. You may not drive or operate heavy machinery while on narcotics.

PROBLEMS TO WATCH FOR—NOTIFY YOUR SURGEON IF YOU HAVE ANY OF THESE SYMPTOMS:

- SEVERE pain not relieved by pain medication.
- Temperature over 101 degrees. Take temperature daily for 5-7 days.
- Heavy bleeding that soaks through your dressing/clothes.
- Redness, extreme swelling and/or pus at the incision site.

FOLLOW-UP:

- **Return to clinic to see Dr Shridharani in:**
 3 weeks **other** _____
- Feel free to come in earlier if you have any concerns.

If you have had general anesthesia, it is important to keep your lungs clear and expanded, by taking deep breaths every 2 hours for 24 hours, while awake. Also, until you are back to your normal activity level, it is important to maintain good circulation by being up and around at home, but not in excess.

Please call 423-778-5910 our practice's main number if you are unable to reach us through the clinic number at the top. You will be able to reach the on-call physician after clinic the clinic is closed.
